Education

University Of Central Missouri

Masters in Computer Science

2024 – 2026

Warrensburg, Missouri USA

KL University

Bachelor's in Computer Science

2020 – 2024

Guntur, India

Technical Skills

Languages: Java, Python, C

Database: MySQL, PostgreSQL, MongoDB

Backend: Java, Spring Boot, Spring Security (JWT), REST APIs, Hibernate, Spring Data JPA, Node.js, Express.js

Frontend: HTML, CSS, JavaScript, Bootstrap, ReactJS

Cloud: AWS EC2, S3, Cognito, SNS, CloudWatch

Testing: Selenium, JUnit, Mockito, Cucumber

Relevant Coursework

- Data Structures
- Database Management Systems
- Object-Oriented Programming
- Software Engineering

Experience

University of Central Missouri

Research Assistant

Dec 2025 – May 2026

Warrensburg, Missouri

- Supported research initiatives focused on Java full-stack application development by designing, implementing, and evaluating backend services, RESTful APIs, and database interactions to improve system performance, scalability, and application reliability.
- Developed and tested Spring Boot modules, integrated REST APIs, and optimized database operations using Spring Data JPA and Hibernate while ensuring maintainable and scalable application architecture.
- Performed unit testing, API validation, debugging, and performance analysis using JUnit, Mockito, and Postman to identify defects, improve code quality, and ensure reliable application functionality.
- Documented research findings, technical designs, implementation approaches, and test results to support software development, knowledge sharing, and future research activities.
- Collaborated with faculty members, researchers, and development teams to evaluate new technologies, resolve technical challenges, and translate research outcomes into practical software solutions.

University of Central Missouri

Program Analyst

Jan 2025 – Dec 2025

Warrensburg, Missouri

- Developed and maintained full-stack web applications using Java, Spring Boot, ReactJS, RESTful APIs, HTML, CSS, and JavaScript by implementing scalable, reusable, and maintainable features based on business and functional requirements.
- Designed, developed, and integrated REST APIs with Spring Data JPA, Hibernate, and MySQL to support secure user authentication, efficient data processing, and seamless communication between frontend and backend services.
- Improved application performance by analyzing existing systems, optimizing backend services, refactoring code, and resolving performance bottlenecks to enhance scalability and user experience.
- Executed unit testing, API testing, debugging, and issue resolution using JUnit, Mockito, Postman, and browser developer tools to ensure software quality and reliable production-ready releases.
- Collaborated with developers, QA engineers, and business stakeholders in an Agile environment by participating in sprint planning, daily stand-ups, backlog refinement, and code reviews to deliver high-quality software solutions on schedule.

Projects

Healthcare Management System

Java, Spring Boot, REST APIs, MySQL, ReactJS

- Designed and developed a full-stack healthcare management system for managing patient records, appointment scheduling, doctor availability, and electronic medical records using Java and Spring Boot.
- Developed secure RESTful APIs to enable seamless communication between ReactJS frontend components and backend services while maintaining role-based access control.
- Designed a symptom assessment workflow to improve appointment prioritization and patient management.

- Designed normalized MySQL database schemas for patients, doctors, appointments, prescriptions, and medical records while ensuring secure and efficient data management.
- Improved application maintainability by implementing layered architecture, reusable service components, and optimized backend logic following Spring Boot best practices.

Online Shopping (E-Commerce) Web Application

Java, Spring Boot, REST APIs, MySQL, ReactJS, Payment Gateway, Agile

- Developed a full-stack e-commerce platform supporting product browsing, shopping cart management, secure checkout, order processing, and payment integration using Java, Spring Boot, ReactJS, and MySQL.
- Designed scalable RESTful APIs for product catalog, inventory, user management, and order lifecycle while integrating ReactJS frontend components with backend services.
- Implemented a recommendation module that leveraged user browsing history and purchase behavior to provide personalized product suggestions and improve customer engagement.
- Designed optimized relational database schemas for products, users, orders, carts, and payment transactions while ensuring efficient query performance and data consistency.
- Improved application performance and user experience by optimizing backend services, reducing API response times, and enhancing checkout workflow reliability.

Car Pooling Platform

ReactJS, Node.js, Express.js, PostgreSQL, REST APIs, AWS

- Developed a full-stack car pooling platform enabling users to create, search, book, and manage rides through a responsive ReactJS frontend integrated with a Node.js and Express.js backend.
- Designed secure RESTful APIs for ride management, booking operations, user authentication, and role-based access control using JWT and PostgreSQL to ensure reliable backend communication.
- Integrated AWS services including Amazon Cognito for authentication, Amazon S3 for file storage, Amazon SNS for notifications, and Amazon CloudWatch for application monitoring and centralized logging.
- Implemented backend security and reliability features including bcrypt password encryption, Helmet, CORS, request validation, rate limiting, centralized error handling, and structured logging.
- Designed a modular backend architecture with PostgreSQL integration and AWS service connectivity, enabling scalable deployment and secure backend operations.

Certifications

AWS Certified Solutions Architect

AWS Certified Cloud Practitioner

Red Hat Certified Enterprise Application Developer (EX183)

Workshops/Hackathon

Workshop Participant – Cloud / DevOps / AI

2024

University of Central Missouri

- Participated in hands-on workshops covering AWS cloud services, Docker containerization, Microservices architecture, and AI fundamentals.
- Configured EC2 instances, managed S3 storage, and implemented basic CI/CD pipelines for application deployment.

Hackathon Participant

2023

University Level Competition

- Developed a Java full-stack prototype using Spring Boot within 72 hours.
- Collaborated in a team environment to design RESTful APIs, frontend workflows, and database schema.
