Education

University Of Central Missouri

Masters in Computer Science

2024 – 2026

Warrensburg, Missouri USA

KL University

Bachelor's in Computer Science

2020 – 2024

Guntur, India

Technical Skills

Languages: Java, Python, C

AI/ML: Machine Learning, Data Analysis, NumPy, Pandas, Scikit-Learn, Data Preprocessing

Database: MySQL, PostgreSQL, MongoDB

Backend: Spring Boot, Spring Security (JWT), RESTful APIs, Hibernate/JPA, Node.js (Basic)

Frontend: HTML, CSS, JavaScript, Bootstrap, ReactJS

Cloud: AWS, EC2, S3

Testing: Selenium, JUnit, Mockito, Cucumber

Relevant Coursework

- Data Structures
- Database Management Systems
- Object-Oriented Programming
- Software Engineering

Experience

University of Central Missouri

Research Assistant

Dec 2025 – May 2026

Warrensburg, Missouri

- Supported research activities involving Java full-stack applications, data analysis, and system evaluation.
- Assisted in analyzing research datasets using Python and data-driven techniques to support AI/ML exploration and technical decision-making.
- Evaluated backend services, REST APIs, and database interactions for performance, scalability, and reliability.
- Conducted experimental analysis and testing to validate research hypotheses and technical solutions.
- Translated research findings into technical documentation and implementation guidelines for development teams.
- Collaborated with researchers and developers to integrate research outcomes into real-world applications.

University of Central Missouri

Program Analyst

Jan 2025 – Dec 2025

Warrensburg, Missouri

- Designed and developed end-to-end full-stack applications using Java, Spring Boot, RESTful APIs, and React.
- Built scalable and modular components to improve application performance, maintainability, and reliability.
- Evaluated existing systems to identify performance gaps and implemented optimization strategies to reduce latency.
- Coordinated with QA teams and cross-functional stakeholders to ensure high-quality releases.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and backlog refinement.
- Analyzed business requirements and translated them into scalable full-stack technical solutions.

Projects

Online Shopping (E-Commerce) Web Application

Java, Spring Boot, REST APIs, MySQL, ReactJS, Payment Gateway, Agile

- Built a full-stack e-commerce platform supporting product browsing, cart management, checkout, and order processing.
- Developed backend services in Java and Spring Boot for product management, pricing, inventory, and order lifecycle handling.
- Implemented REST APIs to integrate ReactJS frontend components with backend services.
- Designed relational database schemas for products, users, orders, carts, and transactions.
- Analyzed user behavior and system performance to improve checkout flow, reliability, and user experience.

Car Pooling Platform

Java, Spring Boot, ReactJS, PostgreSQL, Machine Learning, REST APIs

- Developed a full-stack car pooling platform enabling users to offer, search, and join rides based on location and travel schedules.
- Built scalable REST APIs using Spring Boot for ride creation, booking management, user authentication, and trip tracking.

- Implemented secure authentication and authorization using Spring Security and JWT for drivers and passengers.
- Utilized Python, Pandas, and Machine Learning techniques to analyze travel patterns and generate ride recommendations.
- Performed data preprocessing, feature engineering, and exploratory data analysis to improve recommendation accuracy.
- Designed and optimized PostgreSQL database schemas for rides, bookings, users, and trip history.

Healthcare Management System

Java, Spring Boot, REST APIs, MySQL, ReactJS

- Designed and developed a full-stack healthcare management system to manage patient records and appointment scheduling.
- Built RESTful APIs to enable secure data exchange between frontend and backend components.
- Created relational database schemas to store patient, doctor, appointment, and medical record information efficiently.
- Implemented ReactJS components to provide a clean user interface for patient and appointment management.
- Improved application maintainability by organizing backend logic into controller, service, and repository layers.

Additional Skills

Machine Learning: Supervised Learning, Data Preprocessing, Feature Engineering

Data Analysis: NumPy, Pandas, Data Visualization

Soft Skills: Problem Solving, Communication, Team Collaboration, Ownership Mindset

Leadership / Extracurricular

Workshop Participant – Cloud / DevOps / AI

2024

University of Central Missouri

- Participated in hands-on workshops covering AWS cloud services, Docker containerization, Microservices architecture, and AI fundamentals.
- Configured EC2 instances, managed S3 storage, and implemented basic CI/CD pipelines for application deployment.

Hackathon Participant

2023

University Level Competition

- Developed a Java full-stack prototype using Spring Boot within 72 hours.
- Collaborated in a team environment to design RESTful APIs, frontend workflows, and database schema.
